

A black and white photograph of a woman with dark hair, wearing a patterned kurta and a light-colored shawl. She is looking off to the side with a thoughtful expression while holding a tablet. In the bottom left corner, there is a red circular graphic showing a close-up of hands holding a device.

**Her diagnosis
was aggressive.
Her spirit was
stronger.**

At just 29, she discovered
a lump that changed her life.

When a lump raised unexpected concerns

Initial tests outside showed only a benign growth.

But Medanta doctors dug deeper.

A repeat scan and biopsy confirmed the cancer.

What seemed harmless turned out to be triple-negative breast cancer, one of the most aggressive forms.

A plan that protected her today, and tomorrow

Before starting treatment, she was counselled on fertility preservation. Her care plan was designed to balance survival with her dream of motherhood.

Oocyte cryopreservation

Tumour mapping and chemoport insertion

Successful ovarian stimulation

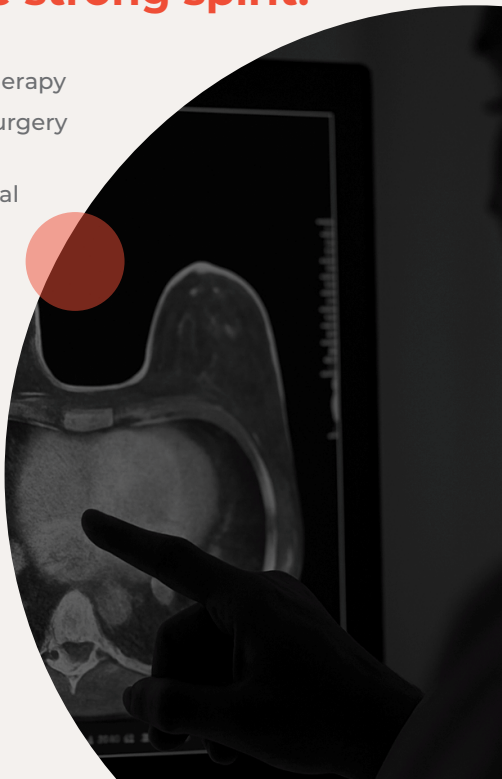

Six months. Countless battles. One strong spirit.

She endured:

- 16 cycles of chemotherapy
- Breast-conserving surgery with reconstruction
- Radiotherapy and oral chemotherapy

Throughout every stage, psychosocial support helped her cope with anxiety, depression, and side effects.

Handled with precision, empathy, and expertise

Medanta's multidisciplinary team guided her journey - combining advanced science with compassionate care.

Today, she is not just cancer-free, but thriving as a budding entrepreneur.

Medanta Super Speciality Hospital, Lucknow

Handled with precision.
Strengthened by teamwork.

Led by **Dr. Amit Agarwal**, Director - Cancer Care,
and **Dr. Roma Pradhan**, Associate Director - Cancer Care,
Medanta's expert team ensured that every decision
safeguarded both the patient's present and her future.

Cancer ki mushkil ladaai ko
aapke saath milkar ladna,

Jaanta hai
Medanta
